

## Long Term Water Supply Plan for Kangaroo Island

You are invited to attend one of the following informal drop-in sessions to learn more about SA Water's review of the Long Term Water Supply Plan for Kangaroo Island.

These sessions are an opportunity for you to talk directly with our staff and understand the preferred options we've identified with the community Reference Group. It will also be an opportunity for you to provide feedback on our draft update. You can pop in at any time during the times below.

The only session with a formal presentation will be at the Kingscote Town Hall on Wednesday 9 May where we will provide a visual presentation at 12.30pm followed by an opportunity to ask questions about the Long Term Planning process. All other sessions are informal and you can drop-in at any time during the start and finish time indicated.

The Reference Group, comprising of representatives from 18 community, business and industry associations, have led the first phase of the review by working with SA Water to examine the current issues and opportunities and to act as a conduit to their stakeholders.

The plan considers the current and projected water supply and demand, as well as possible upgrade options for the future. This is to ensure demand can be met for both residential and commercial purposes.
